Description			
<p>Hello, I'm trying to set startup timeout using a defined VAR but it's not working.</p> <pre><VAR name="IDLE_TIMEOUT" help="idle timeout value" dynamic="true"> <ACTION> echo -n "60" </ACTION> </VAR> <STARTUP view="{VIEWTYPE}" timeout="{IDLE_TIMEOUT}"> <ACTION> cat /etc/banner </ACTION> </STARTUP></pre>			
<p>I did some troubleshooting and it seems that the variable is not evaluated before calling <code>clish_shell__set_timeout</code> function. I'm running klish 1.7.1. Do you have any suggestion to make it work? Thank you!</p>

Hello.
It will not work. Not all fields are dynamic. The 'timeout' field is static and gets digits only.
